clinic

Sanitize
footwear

Use a Klenz unit to sanitize patients' footwear when they visit your clinic, as an extra chargeable service. One 8-minute cycle inside a Klenz has an incredibly strong antifungal, antibacterial & deodorising effect - heavily reducing the risk of infection, prolonging the life of the shoe, and completely neutralising odour.

Prevent
infection &
odour

Footwear is a breeding ground for pathogens. By 'klenzing' shoes you can assure patients that the risk of re-infection is minimised. This removes the reliance on patients to self-treat footwear at home, allowing you to offer patients the most effective shoe treatment to date.

Increase
profit

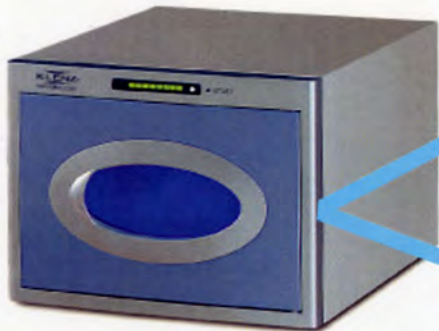

Klenz is a low cost, one-off investment with no consumables & low power consumption. By charging patients a small amount (e.g. £1-2 per pair), the unit will quickly pay for itself & create ongoing revenue for years to come.*

Nano Silver
Technology

Silver's cleansing properties have been known since ancient times, NASA even use it to sterilise astronauts' drinking water. Klenz maximises its sterilising power by splitting it into nano sized particles (75,000x smaller than human hair) & combining it with ozone, itself a strong antimicrobial agent, to completely eradicate pathogens in and on shoes.

*Product life = 10yrs based on use 10x daily

A unit is a similar size & shape to a microwave - an attractive addition to your clinic.

Klenz uses no heat/liquid/harmful chemicals - no damage to shoes. Harmless to humans, animals & the environment.

Once footwear is placed inside the chamber, Nano Silver ions & Ozone are blown in & around it by an inbuilt fan, ensuring every square millimeter is sanitized and the maximum number of pathogens are eradicated.

The Silver & Ozone cause the respiration and electron transfer of microbial cells to be repressed, meaning they are essentially suffocated. Anything inside the chamber during a cycle emerges sterile.

'The technology is flawless.'

William Hamilton. F.S.S.Ch. Dip. Pod-Med. M.B.C&P A.

'Every Chiropodist, Podiatrist & Foot Health Practitioner in the country should have one!'

Victor Fletcher, President of the Alliance of Private Sector Chiropody & Podiatry Practitioners
